Hi Madi,

I know your planning oversight on Friday this week but we had one of our staff out sick today and are trying to cover oversight on one of the sediment sampling boats today. Let me know if you have any availability to observe on the Cayuse today.

Thanks

Howard

Hi Howard,

I'd like to schedule a call to go catch up on surface sediment sampling oversight status before I head out on Friday (assuming that is still a good time for me to go). On Thursday, I'm available at 8:30, between 11 and 1, and at 2:30. Let me know what works for you – thinking a 30 minute window, but may not need that much time.

Thanks!

Madi
